

# What is the price of Australian quality inverter

## Overview

---

Micro inverters can start as low as \$195 apiece. String inverters can vary from \$500 to around \$5,000. Meanwhile, hybrid inverters are anywhere from \$600 to around \$4,000. When choosing a system, you'll often have a budget or premium option.

Micro inverters can start as low as \$195 apiece. String inverters can vary from \$500 to around \$5,000. Meanwhile, hybrid inverters are anywhere from \$600 to around \$4,000. When choosing a system, you'll often have a budget or premium option.

A quality inverter can maximise your energy yield, ensure safe operation, and last for many years with minimal issues. In this updated 2025 guide, we'll highlight the best solar inverters for Australian properties – with a focus on Clean Energy Council (CEC) approved models, local conditions, and.

Solar inverters vary quite a bit in price. Micro inverters can start as low as \$195 apiece. String inverters can vary from \$500 to around \$5,000. Meanwhile, hybrid inverters are anywhere from \$600 to around \$4,000. When choosing a system, you'll often have a budget or premium option. Premium.

But, just like solar panels there are plenty of inverter types and brands to choose from – each with its own features, strengths, and price points. This can make the choice feel all the more overwhelming, especially if you especially if you're not quite sure what to look for or how each option.

How much does an inverter cost?

What about brands that are not on this ranking?

Note: Solar Choice is not an installer and has no incentive to promote one brand over another. Be careful of installers' articles on the web suggesting the brands they sell are the best! PV Evolution Labs Top Performer?

Solar Inverter Buying Guide 2026: What You Need to Know! Up to \$18,600 Solar

Battery Rebates Available! Choosing the right solar inverter is one of the most critical decisions you will make when installing a solar power system. As the heart of your solar setup, the inverter converts DC electricity.

String Inverters are the most common and cost-effective option for Australian homes. A single central unit manages all your solar panels, making installation straightforward and cost-effective. These work best for properties with minimal shading and simple roof layouts. String inverters from.
