NextEra Energy stands as the world's largest producer of renewable energy from wind and solar sources. The company operates approximately 24,600 megawatts of net generating capacity and has maintained an impressive track record with average annual total returns of 15.7% over the past 20 years.

The International Energy Agency (IEA) says batteries will make up 90% of the sixfold increase in global energy storage capacity through 2030, while 1,500GW is estimated to be available by the end of the decade. This growth is led by falling costs, innovations in technology, and favorable policies.
